

Ninth meeting

1st October 12:30pm

Meeting begun

Sashen's Section

- So far so good
- The participatory design sessions have been successful
- Implementation is moving on
- Cannot implement the dragging of file objects onto WP7 tiles.

Tsu-Shiuan's section

- Bluetooth presenting many problems
- Spoke to Pier about issues, who helped a lot
- The tablet's Bluetooth is too slow to receive the higher speed Bluetooth data
- Direct Wi-Fi connections require Wi-Fi direct, which is only available on Android 4.0 and higher
- Must look into AP mode for devices
- Not required to send files across for testing. Just bytes.
- Look at serialization-should be a Java library
- Look at adding more devices
- Draw graphs of one server and increasing numbers of Clients
 - Check for linear/asymptotic etc degradation of speed

Bryan's Section

- Discovery system basically complete.
- Look at Kenton's open spaces for theory to backup implementation
