

# Feedback from User Evaluation

## Ingestion Manager

- Load collections list faster
- Alert pop-ups on success or failure instead of a new page
- Timestamps for batch submissions and approvals
- Allow for pressing enter button instead of clicking submit/login
- Confirm remove/approve
- Link in navbar when not logged in to redirect to login page
- Show filename in submission success message
- Straight from logout go to login page
- Log which managers approved/removed which batches
- Change colour of download button to light blue like in Report Writer
- Instead of download button allow download on click of filename

## Report Writer

- Table heading to be capitalized and remove underscore
