

# Meeting Notes - 29 September 2015

Meeting: Hussein, Darryl and Craig

- Need to organise user acceptance test for after the system is finished
  - Email Lazarus for that
- Example reports:
  - List everything in repository per institution per type per year
  - Summary of statistics per institution per type per year
  - Institutional productivity per type
    - e.g. all thesis by institution across years
  - Comparisons between communities
  - Have a look at CS pubs for example reports
- Use the REST API rather than connecting to the database when collecting the list of collections from the repository
- Show a sample of the submission on the details page
- Send user a message when the submission is declined
  - Make the email address clickable (mailto)
  - Include a subject with the filename of the submission
- Will the embedded images be printable? viewable in MS Word?
- Don't include support for the Oracle database

Next meeting on Monday 5 Oct at 11am.
