

# Meeting Notes - 5 October 2015

- Evaluation plan
  - Usability testing required
    - Usability questionnaire (System Usability Scale test)
    - Ask hons students
  - Reporting on results of SUS
    - Ask as many people as possible (12+)
    - Don't use the single value result
  - User acceptance testing
    - Use case based
    - Google search for examples
    - Email instruction to Lazarus
  - Performance testing
    - Amount of data based
      - Test report generation times and size of batch
    - Show that the performance doesn't degrade as the size increases
    - State the following in the write up:
      - Instrumentation
      - External measurements
      - Repetition
        - $n + 1$  (throw away the first result due to caching)
      - Use basic statistics
  - If you discuss something at a URL, it should be referenced but if it is just a link, a footnote is fine.
