

Meeting Minutes - 13 June

- Saleem explaining updates to his database design
- feedback:
 - Single user will look at multiple scenarios so user table and test table are problematic
 - User table needs to implement scenario ID differently
 - User table needs a password & username field
 - Scenario table correct
 - Needs to add type table
 - need to collapse 3 events in state table to use brackets rather than individual columns
 - Need scenario ID in test table
 - drop scenario ID from user table
 - remove state 1-5 from test table and replace with brackets
- Saleem needs to send tommie something by Thursday
- Michael needs rough prototype/wireframe that we can run through
- Marcel needs very basic app that has some buttons that work. Ideal situation is a button that can post/retrieve some data
