

Meeting discussing team roles & readings for literature review.

- Each give feedback on the readings we did.
- Francois suggests keeping the model as modular as possible hence leaving out the cognitive tests described in paper 2.
- Overview of team roles: Marcel doing android dev; Michael doing web side; Saleem doing back end for both.
- We need to read up on other models, comment on why the other models may or may not exist.
- Comment on what has been done on social engineering so far.
- Comment on where the literature is lacking.
- First draft of lit review to Francois and Tommie by Wednesday 20th.
- Francois Skype address is MattonF...
- Possible focuses for the lit survey: attack frameworks, attack examples(look at existing examples and how to generate examples), defence/detection frameworks
- Tentative prototype deadline is mid July so we can do testing in time for final paper submission.
- Next Meeting on Friday 22 at 11:00 am.
