

Meeting Reviewing Literature Review First Drafts

- Nothing particularly wrong with the reviews uploaded
- Marcel's Paper:
 - Lots of focus on Francois' models and 2 other models.
 - Not much focus on other models
 - Needs to look for more models
 - must add Francois' new paper
 - remove specific things from project introduction
 - Look at michael's table comparing elements to help conclude paper
 - keywords need to be in alphabetical order
 - correct number of citations
 - just needs to conclude and do final work
 - use francois' exact definition in introduction
- Michael's paper:
 - Introduction must flow more - talk about how communication has hanged, human psyche, computer security moved from computer to human.
 - Add fluffy introduction and narrow down to topic
 - Write SEPTT out in full and then in brackets
 - No space between in text citation and words end
 - Need to add flow paragraph after introduction paragraph
 - look at each other's papers for ideas
 - Try get table to span over two columns
 - Structure discussion like marcel's
 - use keywords like his
 - lit review as a critical analysis of the attack
 - avoid using slash in paper. use "or"
- Don't try to alter your style to match other's.
- Francois will help with latex, he will move our projects into share latex
- Next week's meeting
